SUBJ: Northwest EnviroService, Inc. Western Blower Property Closure Plan

Dear Ms. Safioles:

Attached is the RCRA interim status closure plan for that portion of the Northwest EnviroService, Inc. (NWES) Airport Way South Facility referred to as the Western Blower Property. We are submitting this plan in accordance with your letter dated August 23, 1996 so that this portion of our property can proceed through the public notice required by the RCRA closure process.

The Interim Status Closure Plan for the Western Blower Property was prepared by editing the Interim Status Closure Plan for the Airport Way South Facility to reflect only the information related to the closure of the Western Blower Property. Therefore, the technical content of the Western Blower Property closure plan remains the same as in the original plan which Ecology and EPA Region 10 have reviewed and issued a notice of deficiency (NOD) on. The one element of that NOD related to the Western Blower Property regarding the constituents of concern is incorporated into this plan.

We appreciate Ecology's and EPA's efforts in keeping the closure process for the Western Blower Property moving forward. If you have any questions regarding this submittal please call me at (206) 763-2700.

Sincerely,

J. Stephan Banchemo, Jr.
President
